

Biometric Technology Consent

Heart of Synergy uses the HeartMath Inner Balance monitor and HeartMath emWave® software to evaluate students' in-the-moment heart rhythm patterns and coherence levels. The technology is non-invasive. Individuals are connected to the monitor and software by an ear clip sensor or finger clip sensor.

Heart of Synergy's certified and licensed Resilience Building Mentors and HeartMath Coherence Intervention Practitioners only monitor incoherent and coherent heart rhythm patterns and levels. The HeartMath Inner Balance monitor and HeartMath emWave® software are not used for medical or diagnostic purposes.

I AGREE for Heart of Synergy to use the HeartMath Inner Balance monitor

and HeartMath emWave® software on _____.
